EDUCATION

Columbia University, New York, NY

09/2024 - 05/2026

M.S. Computer and Information Science | GPA 3.77

- Relevant Coursework: SQL | Anomaly Detection | Data Visualization & Storytelling | Research Design

Macau University of Science and Technology, Macau SAR, China

09/2020 - 05/2024

B.A. Business Analytics | GPA 3.70

- Relevant Coursework: Data Mining | Data Structures | Macroeconomics | Machine Learning | Big Data

EXPERIENCE & PROJECTS

Handshake AI Project Brass II, Remote

04/2026 – Present

AI Model Evaluation Contractor

- Designed realistic computer-use tasks and prompts based on workflows in native Apple iOS applications to train AI models to better understand and execute real-world user interactions
- Evaluated AI model performance by assessing task execution, instruction adherence, and response quality, identifying failure cases, and refining prompts to improve task clarity and model reliability

Chubby Group, New York, NY

02/2026 – 05/2026

Growth and Operations Analyst

- Utilized SQL and Looker Studio to consolidate sales, customer feedback, and operational data across 10+ restaurant locations into performance dashboards tracking revenue trends, customer sentiment, and campaign KPIs to support data-driven business decisions
- Conducted root-cause analysis on declining sales by analyzing transaction data, Google reviews, and store-level operational metrics, identifying service bottlenecks, wait-time issues, and campaign conversion gaps, and translating findings into actionable recommendations
- Developed store- and campaign-level performance analyses to compare revenue trends, promotional effectiveness, and operational performance across locations, supporting management decisions on campaign strategy and resource allocation
- Analyzed member engagement, repeat purchase behavior, and campaign performance to identify customer retention opportunities and support data-driven lifecycle marketing strategies

David J. Joseph Company, New York, NY

09/2025 - 12/2025

Data Analytics Consultant (Capstone Project)

- Developed demand forecasting models using historical inventory and order data to predict weekly order volume over a 20-week planning horizon and support inventory management decisions
- Performed data cleaning, exploratory analysis, and feature engineering in Python to identify key demand drivers, and developed ARIMA and XGBoost forecasting models to improve demand prediction accuracy
- Collaborated directly with DJJ stakeholders through weekly client meetings to gather business requirements, communicate analytical findings, and incorporate evolving operational needs into model development

Theme Park Information Web App, New York, NY

01/2025 - 04/2025

Database & API Integration Developer **Demo:** <https://keirahao1112.shinyapps.io/Team1/>

- Designed and implemented a relational SQL database to centralize theme park, attraction, restaurant, and operational data, defining table schemas, primary and foreign keys, and relationships to support reliable data retrieval
- Integrated external APIs to collect and ingest theme park information, transforming semi-structured API responses into standardized formats before loading them into the SQL database
- Developed SQL queries and database access logic to connect the backend database with the R Shiny application, enabling dynamic data retrieval and display based on user selections

Yonyou Network Co., Ltd, Macau SAR, China

05/2024 - 08/2024

Data Engineering Intern

- Built and maintained ETL pipelines using SQL and Python to process and integrate 10M+ records from multiple operational data sources
- Optimized SQL queries and data transformation workflows to improve pipeline efficiency and reduce operational reporting preparation time by 40%
- Implemented data validation and quality checks to identify missing, duplicate, and inconsistent records, improving the reliability of downstream datasets used for operational reporting and analytics

SKILLS

Technical: Python, SQL, PostgreSQL, BigQuery, Tableau, Looker Studio, Power BI, Excel, MongoDB

Analytics: ETL & Data Pipeline, Data Quality & Validation, A/B Testing, Metrics Design, Data Visualization

Language: English, Mandarin, Cantonese
